

**FISCAL NOTE**  
**HB 2285 - SB 2264**

February 2, 2004

**SUMMARY OF BILL:** Provides for municipalities to enter into a contract or interlocal agreement with the county in which they are located to bill and collect storm water fees as an item on the property tax notice.

**ESTIMATED FISCAL IMPACT:**

**Increase State Expenditures - \$30,000 One-Time**

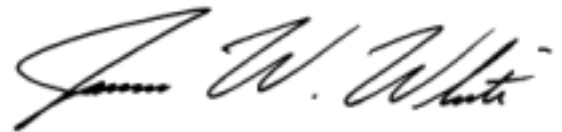

**Increase Local Govt. Expenditures - Less than \$100,000 /Permissive**

Estimate assumes:

- to the extent any local government which contracts with the state to provide tax notices chooses to include such storm water fee on its tax notice, it will require computer system changes in the Division of Property Assessments at a one-time cost of \$30,000.
- to the extent the additional line item requires a larger tax notice as it would in counties for which the state issues tax notices, the local government would experience an increase in expenditures for postage for such larger notices.
- in counties that produce their own tax notices, this change may require computer system changes that would increase expenditures.
- the increase in local government expenditures is estimated to be less than \$100,000 statewide and depends on the number of municipalities contracting with counties to collect storm water fees on property tax notices.
